

Combination Emergency Services

Start Date: 3/7/2020 9:00 AM

End Date: 3/7/2020 6:00 PM

Utility Terrain Vehicles (UTV), All-Terrain Vehicles (ATV), and Trailers have gained wider acceptance and use in both the fire service and EMS. Often equipment is needed, but cannot be accessed by or carried on traditional vehicles. To meet these demands, emergency services organizations are purchasing specialty vehicles and trailers to transport equipment. These pieces of equipment can solve these organizational issues, yet many departments lack the expertise or training for safe operation. This offering is a combination of two instructor-level programs developed to teach the emergency vehicle operator the proper techniques and procedures for operating these specialty vehicles and trailers safely.
