

# Managing Volunteer & Combination

**Start Date: 9/29/2022 6:00 PM**

**End Date: 9/29/2022 8:00 PM**

Emergency service organizations are not what they used to be. No longer is an emergency service organization a group that just responds in an emergency. Today, an emergency service organization is a quasi-business, responsible to the citizenry, subject to public scrutiny and governmental rules and regulations. Times have changed and emergency service organizations must be managed responsibly. This seminar provides emergency service organization leaders and members with the knowledge to lead their organization in the 21st Century.
